Vision Statement

To be your trusted learning, development and solutions partner dedicated to the empowerment, growth and upliftment of communities through continuous learning by creating more opportunities.

We bring to the table an integrated client-centric solution, state-of-the-art concepts, digital transformation and industry experts that fit your culture, challenges and requirements.

Mission Statement

Growing People

TLO Believes in growing people from where they are to where they want to be. We believe in growing people outside of their habits and comfort zone. Growing people increases employability for the individual, a more competent workforce and by extension creates a better future for all.

Building Talent

As a growing business we understand the challenges around hiring the right talent, migrating our hired talent to loyal staff members, and developing them further through succession planning. In today's fast-paced environment, dynamic and growing organisations continuously up-skill, cross-skill and re-invent themselves to stay ahead of the pack. Building Talent is essential as it creates employment opportunity for others. Our passion and 'can-do' attitude seeks to understand our clients' needs and outcomes first, before recommending the most appropriate solution.

Creating Leaders

Central to the value we create is the creation of strong Leaders. Principle-centred Leaders. Leadership is more than a title; it is rather a set of values, beliefs and behaviours that gives direction to one's leadership style, aligned with the organisation's values.

We achieve this through:

- Local understanding with global insight
- Thought Partnership – we bring to the table an integrated client-centric solution by blending state-of-the-art concepts and industry experts that fit your culture, challenges and requirements
- Extending our accreditation status with all relevant SETA's

Integrity

Customer Centricity

Systems Thinking

Empowering Teamwork

Creativity

Introduction

Previously part of the Rosebank Business College, The Learning Organisation (TLO) established itself as an independent, innovative, solutions-driven provider of corporate learning and development in 2002.

B-BBEE Level 2 QSE Empowering Supplier

51% Black Women Owned

100% Women Owned

Our Methodology is based on the principles of A Learning Organisation (a term first coined by Peter Senge) and Neuro-Linguistic Programming (NLP) which is the 20% value-add to our clients that leads to 80% of the results achieved

A Learning Organisation facilitates **the learning** of clients and team members by continuously transforming people through enhancing skills and knowledge.

Neuro-Linguistic Programming (NLP) deals with influence: how people relate and communicate to others, how they make decisions and how they prefer to be influenced. Neuro refers to neurology (how the mind works), Linguistics – the use of language and Programming – the internal programmes that run between the mind and what we say and how we behave. In essence it is a pragmatic school of thought that is specifically valuable when we sell to clients, service our customers, present to others and negotiating win-win.

Skills Development Maximising

The Learning Organisation embraces the new skills required in the 4th Industrial Revolution and entrenches its service proposition in recognition of the fact that employees are the cornerstones of the competitive edge in creating sustainable and profitable companies.

To assist our clients in maximizing this competitive edge we assist by fulfilling their needs with the following services:

Skills Development:

- Keep our member companies abreast of “best practice” in the human capital and skills development space.
- Developing staff and organisations to overcome 4th industrial revolution changes by creating and instilling creative thinking skills, IT Skills and other revolutionary skills required to overcome the 4th industrial revolution.
- All training related to skills development strategy and compliance.
- Needs analysis and skills audits.
- Business consulting in the skills development and human capital environment.
- Customized training solutions in all areas of the human capital value chain.

ETD Consulting:

- Consult with companies on all SETA related matters including funding, WSP/ATR's, registrations of learnerships, internships and skills programmes, Intersecta Transfers, bursary management and work integrated learning programmes.
- Consult and assist with maximizing access to SARS Tax Rebates and ETI incentives
- Regular updates on skills development and human capital legislation, regulations and compliance.
- Creating sustainable structures through ETD consultancy which enable and enhance organisational growth resulting in increased productivity and ROI
- Developing and implementing effective business strategies to increase business sales and profits
- Bursary Management
- Needs analysis and skills audits

Coaching and Mentoring:

- Coaching and Mentoring of staff to create the next generation of leaders
- Consult and assist businesses to take into consideration economic factors such as the 4th Industrial Revolution and how these impact on both the employees and employer
- Using coaching and mentoring processes as part of performance management within an organisation

Skills Development Maximising cont.

Talent Management:

- Recruitment of Abled and Disabled candidates
- Keep our member companies abreast of “best practice” in the human capital and skills development space.
- Assist in developing fundamental knowledge and competencies required by the organisation from its employees
- Development of staff through skills development
- Maintaining both business requirements while meeting legislative requirements and consulting on both to assist business in best practices
- Creating talent pools through external programmes
- Sourcing and retaining the correct talent
- Creating growth opportunities through hosting that have a lesser financial impact
- Needs analysis and skills audits
- Performance and Change management
- Talent management and succession planning

B-BBEE Consulting:

- Consult and assist with BBBEE Compliance.
- Maintaining both business requirements while meeting legislative requirements and consulting on both to assist business in best practices.

Employment Equity:

- Consult and assist with Employment Equity planning, reporting and your Employment Equity Committee.
- Consult and assist businesses to take into consideration economic factors such as the 4th Industrial Revolution and how these impact on both the employees and employer.
- Maintaining both business requirements while meeting legislative requirements and consulting on both to assist business in best practices.
- All training related to Employment Equity Committees.
- EE compliance Audits

Our Continuous Improvement Approach

How do we operate?

The Learning Organisation provides its clients with innovatively designed solutions that effectively work for their organisations, are customised to their culture, meet their strategic direction and fit in with their organisation's life cycle stage.

We work in partnerships with businesses, by developing programs and qualifications for individuals and organisations, leveraging people development / skills and increasing the talent pipeline. We use a range of models, tools and interventions suited to the client, situation and outcome required.

Our approach focuses on continuous improvement:
